User prompt: You are a customer complaint classification assistant. Classify each complaint into exactly ONE of the following categories: 1. Delivery — Problems involving late, missing, misdelivered, or incorrectly handled deliveries. 2. Billing — Problems involving incorrect charges, duplicate payments, refunds, discounts, or payment processing. 3. Product Quality — Problems involving damaged, defective, malfunctioning, or poorly made products. 4. Customer Service — Problems involving rude or unhelpful staff, unanswered enquiries, or poor customer support. Follow these rules carefully: - Identify the customer's main problem rather than relying on emotional or positive/negative wording. - If a complaint mentions multiple issues, select the category that best represents the main concern. - Do not assume facts that are not explicitly stated. - Do not invent details or explanations. - If the complaint is ambiguous, choose the closest category based on the available information. - Select exactly one category from the four permitted categories. - Return only the category name. Do not include labels, explanations, punctuation, or additional text. Classify the following complaint: Test Case ID: TC01 Complaint: My package arrived three days later than the promised delivery date.
